Douches GIA-Premix - ANSI et EN Standards Compliant

GIA-Premix is a Swedish leader in emergency showers, eyewashes and body showers, and has continually pursued the development of new showers, since 1990, to meet market requirements and guidelines. The production of GIA showers meets the ANSI Z358.1 2014 standards, as well as EN standards, and are designed and manufactured in Sweden, according to the most demanding quality criteria. We can offer a range of emergency showers among the most complete on the market.

The new range of GIA-Premix showers is entirely in stainless steel, with a new model of shower head in Acetal hard plastic, more compact and with a more up-to-date design, offering the same security and the same rinsing cone.

Flow Body Emergency Showers
ANSI Standard Z358.1 2014
75,7 l/min for at least 15 min.

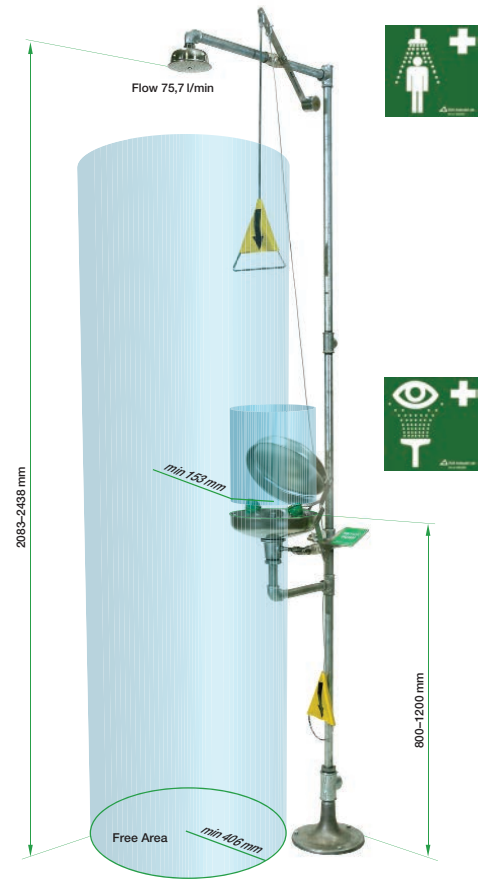

EN 15154-1
At least 60 l/min.

AFS 1999:7
The diameter of the shower and the flow must be such that the whole body is flushed with a large quantity of water in a few seconds.

Flow Eyewashes
ANSI Standard Z358.1 2014
Eyewash, Eyw and face: 11.4 l/min for at least 15 min

EN 15154-1
At least 6 l/min at min. pressure

AFS 1999:7
Simple to activate, leaving the hands free to hold the eyelids open. Provide effective rinsing for a sufficiently long time with physiological rinsing water temperature in case of long rinsing.

GIA-Premix - A comprehensive Range of Emergency Showers
